# Aurora Labs Brand Guidelines

Rulebook fixture • Intended to test guideline ingestion and rule compilation

## 1. Brand voice

• Use a clear, friendly, confident voice. Avoid exaggerated promises and aggressive sales language.

• Do not describe the product as 'revolutionary', 'perfect', or 'guaranteed to work for everyone'.

• Prefer short sentences and explain technical terms when writing for new users.

## 2. Approved terminology

• The product name is Aurora Desk. Always use this exact spelling and capitalization.

• Use 'team workspace' instead of 'collaboration hub'.

• Write 'sign in' as two words. Do not use 'login' as a verb.

## 3. Claims and evidence

• Never claim 100% uptime unless an approved, current source explicitly supports the exact claim.

• Performance claims must include the tested environment and measurement period.

• Customer counts, savings, and percentages must match the current Approved Facts Sheet.

## 4. Visual identity

• Primary brand orange is #F97316. Deep orange is #C2410C. Warm background is #FFFAF5.

• Use the approved Aurora Labs logo without stretching, recoloring, or placing it on a visually busy background.

• Maintain clear space around the logo equal to the height of the logo's symbol.

## 5. Accessibility

• Provide meaningful alternative text for informative images.

• Do not communicate status using color alone; include a text label or icon with an accessible name.

• Links must describe their destination. Avoid link labels such as 'click here'.

## 6. Publication rules

• Blocking: unsupported factual claims, incorrect product name, or prohibited absolute guarantees.

• Warning: terminology drift, overly aggressive tone, or missing image alternative text.

• Advisory: long sentences or optional opportunities to improve clarity.

SYNTHETIC TEST DOCUMENT. All names, claims, products, and figures are fictional. Do not use as real brand guidance.
