Aurora Labs Visual Asset Standards

Visual-review fixture • Test rules for logos, palette, and image handling

Approved palette

Token	Hex	Usage
Primary orange	#F97316	Primary actions and key highlights
Deep orange	#C2410C	Headings and strong emphasis
Warm background	#FFFAF5	Main canvas
Dark ink	#21160F	Primary text

Logo handling

• Use only the approved logo source file supplied by the workspace owner.

• Do not stretch or distort the logo.

• Do not recolor the logo unless an approved alternate asset exists.

• Keep clear space around the logo equal to the height of its symbol.

• Do not place the logo over busy imagery without an approved contrast treatment.

Asset metadata required

• Asset owner and approval status.

• Original filename and media type.

• Pixel dimensions and aspect ratio.

• Alternative text for informative images.

• Source or asset-library reference.

Test limitations

A palette check can compare known colors, and a dimension check can compare aspect ratios. These checks alone cannot establish full semantic brand compliance.

SYNTHETIC TEST DOCUMENT. All names, claims, products, and figures are fictional. Do not use as real brand guidance.
